BS - Biomedical Science, Pre-Medical Concentration

- Minors: Chemistry, Psychology
- Honors Program Scholar
- GPA: 3.65

EXPERIENCE

Oldham County Health Department July 2022 - Present
Epidemiologist/Performance Management Director

- As the Local Epidemiologist for the Oldham County Health Department, my primary tasks revolve around disease surveillance and emergency preparedness. I oversee reportable disease investigation for a population of 68,685 residents. In this role, I collect and analyze local data to improve health outcomes, conduct patient interviews, and provide health education regarding health promotion, vaccination, and infection prevention. Further, as a member of the Community Wellness Division, I assist with the planning and implementation of community events for health promotion and preparedness for all hazards, public health threats, and emergencies. My other duties at OCHD include serving as the Child Fatality Review Coordinator and facilitator for the Oldham County Mental Health Taskforce. In October of 2023, I was promoted to the senior leadership team as the director of a new division, Performance Management, where I supervise OCHD's Accreditation Coordinator, and tackle projects in performance management, strategic planning, workforce development, and continuous quality improvement.

Environmental Public Health Tracking Mentorship Program May 2023 - Present
Mentee

- Direct training and partnership under the KDPH Environmental Public Health Tracking team to receive training in ARCGIS to create data products and utilize EPHT resources to enhance OCHD's "Saturated in Substances" project.

Health Now! Clinic
Volunteer, Co-Manager

November 2017 - July 2022

- My position with the Health Now! Clinic began as a clinical volunteer where I would triage patients, obtain vital signs, and report clinical findings to the health provider. In August of 2020, I was promoted to Clinic Co-Manager where my responsibilities included planning, marketing, and completion of community health promotion events, training new volunteers, attending board meetings, upholding infection prevention measures, and developing health education resources.

University of Kentucky Healthcare
Nursing Care Technician

March 2021 - June 2022

- As a Nursing Care Technician at the Markey Cancer Center within the UK Healthcare system, I provided direct patient care and completed delegated tasks from registered nurses. My responsibilities included obtaining vital signs, phlebotomy, handling specimens, patient charting, assisting with activities of daily living, and preparing patients for surgical procedures.

Nong Han Primary Care Unit
Public Health Intern

June 2019 - August 2019

- As a public health intern with CISabroad in Chiang Mai, Thailand, my tasks included observation, clinical organization and charting, patient communication, obtaining vital signs, assisting in physical exams, fulfilling prescription orders, assist in the planning and completion of health education/health promotion seminars, and attending conferences hosted by the local hospital and the Ministry of Public Health.
